PROFILE

End to end Technical Product Designer with extensive experience delivering user centric software, web, and mobile applications from concept to deployment. Delivering 100's of projects from concept to product. Blending deep UX/UI design expertise with a robust front end engineering background to architect seamless, feasible, and highly accessible digital products. Proven track record of managing cross functional teams, defining business requirements, and maintaining UX consistency across comprehensive product suites in diverse industries including Government, Medical, Defense, and Aerospace.

- Product Leadership: Agile/Scrum project management, cross functional team leadership, budgeting, hiring, and coaching.
- Clearances: Active Public Trust Security Clearance.

CORE COMPETENCIES

- Product & UX Design: Wireframing, Rapid Prototyping, Mockups, User Testing, User Flows, Information Architecture, Design Systems.
- Design Tools: Figma, Adobe XD, Illustrator, Photoshop, Affinity.
- AI Design Integration: Copilot, Claude Code, ChatGPT, Venice, Relume Library, Uizard, Musho AI, local LLM integrations via Ollama.
- UI Engineering & Frameworks: React, JavaScript, TypeScript, CSS, Tailwind CSS (specializing in custom, thematic design systems), Stencil, Angular (18-20), XML, JSON, Responsive Web Design, GridStack modular layouts.
- Standards & Architecture: 508 and WCAG Compliance, Application/Database Architecture, Microservices, CI/CD, Cloud Deployment (AWS, GCP, Azure).

EXPERIENCE

[Lexso Inc.](#)

Product Designer / Sr. Frontend UI Developer

December 2025 - Current

- Product design and UX strategy for Lexso's advanced AI security center, utilizing cutting edge AI tools to inform design decisions.
- Designed complex layouts, comprehensive wireframes, and established UX documentation and guidance for engineering teams.

- Architected modern web experiences incorporating microservices, modular layouts, media streaming, and robust device control.
- Bridged design and development by building UI components with TypeScript and custom Tailwind CSS, ensuring strict 508 and WCAG compliance.

Kforce Inc.

Product Designer / Sr. Frontend UI Developer

September 2024 - March 2025

- Spearheaded the UX and UI design for internal knowledge base portals, help centers, and training repositories.
- Created new design frameworks and component libraries for rapid prototyping and templating.
- Designed and engineered microservices, modular layouts, and highly responsive mobile views using XD, Illustrator, React, and Angular.

Jack Henry & Associates

UX Designer / Sr. Frontend UI Developer

August 2020 - September 2024

- Directed the end to end product design for JHA's business portals, creating brand-new UI designs and product flows.
- Successfully refactored and modernized legacy client experiences, transitioning users from mainframe interfaces to intuitive Web UIs.
- Developed comprehensive wireframes, orchestrated product rebranding, and themed popular UI component libraries to maintain UX consistency across all products.
- Built and coded new scalable components and frameworks utilized by multiple development teams.

Quadient

Product Designer / Sr. Frontend UI Developer

November 2019 - June 2020

- Led the UX development and redesign processes for Quadient's next generation, microservices based platform.
- Designed and engineered component driven dashboards, migrating previous UIs into a cohesive Stencil component library.

- Customized Keycloak utilities and templates, ensuring secure yet user friendly authentication flows.

Southern Talent Specialists, Inc.

UX Designer / Sr. Frontend UI Developer / WebFOCUS Developer

July 2019 - November 2019

- Consulted on the product design of next-generation client incentive products, driving business requirements, technical needs, and feature sets.
- Designed all application workflows, wireframes, and design mockups, subsequently building out the UI frameworks and assets.
- Developed interactive demos and product pages that served as foundational templates for future team workflows.
- Provided expert consultation on modern UX practices, accessibility (508/WCAG), and back-end security integration.

Information Builders

Sr. Solutions Manager & UX Consultant

May 2015 - April 2019

- Oversaw application solution development from initial conception through to final deployment for a diverse portfolio of high profile clients (including Ford, FedEx, Geico, and Lockheed Martin).
- Defined core UX requirements, designed intuitive user interfaces, and created foundational wireframes and workflows.
- Developed high fidelity mockups, art assets, and interactive prototypes for sales demonstrations and product solutions.
- Provided consultation on emerging design trends while actively participating in UI coding, code reviews, and optimization.
